

In the Claims

Please amend the claims as shown below.

1. (Currently amended): A recruiting station for attracting potential recruits and for collecting key data from the recruits at a remote location from a recruiting agency seeking the information without requiring the presence of recruiting personnel, comprising:

- a. An advertising display associated with the station for attracting recruits to the system;
- b. An electronic collection system for instructing the an individual recruit and collecting key employment-related data from the individual recruit; and
- c. A processing system for storing the collected data in an electronic format;

whereby the recruiting station is unmanned and further includes a free-standing cabinet for housing the advertising display, the collection system and the processing system, and whereby the advertising display, the collection system and the processing system are at a remote location from the recruiting agency.

2. (Withdrawn): The recruiting station of claim 1, further including a free-standing cabinet for housing the advertising display, the collection system and the processing system.

3. (Previously Presented): The recruiting station of claim 1, wherein the advertising display is a multi-media display.

4. (Previously Presented): The recruiting station of claim 1, wherein the advertising display includes a video screen.
5. (Previously Presented): The recruiting station of claim 1, wherein the advertising display includes an audio system.
6. (Previously Presented): The recruiting station of claim 1, wherein the electronic collection system includes an instructional screen and a keyboard for controlling the information displayed on the instructional screen and for inputting recruit information.
7. (Previously Presented): The recruiting station of claim 1, wherein the processing system includes a subsystem for storing the collected data in an electronic format.
8. (Previously Presented): The recruiting station of claim 7, wherein the subsystem is a floppy disk.
9. (Previously Presented): The recruiting station of claim 7, wherein the subsystem is a hard drive.
10. (Previously Presented): The recruiting station of claim 7, further including means for remotely downloading the collected data via the Internet.

11. (Previously Presented): The recruiting station of claim 1, further including a plurality of electronic collection systems associated with each advertising display.
12. (Previously Presented): The recruiting station of claim 11, further including a processing system associated with each electronic collection system.
13. (Previously Presented): The recruiting station of claim 1, wherein the electronic collection system is multi-lingual.
14. (Previously Presented): The recruiting station of claim 1, wherein the advertising display is multi-lingual.
15. (New): The recruiting station of claim 1, wherein the station is non-networked.
16. (New): The recruiting station of claim 1, wherein the collected data is manually downloaded from the station.
17. (New): The recruiting station of claim 1, wherein the collected data is searched by the recruiting agency for placement purposes after the data has been retrieved from the station.
18. (New): A method for soliciting employment information, the method comprising the steps of:

- a. providing at least one unmanned, electronic data entry device, whereby the data entry device is housed in a free-standing cabinet;
- b. utilizing the electronic data entry device to acquire employment-related information from an individual seeking employment opportunities;
- c. collecting the acquired information from the data entry device; and
- d. utilizing the information in order to identify candidates most suitable to fill employment opportunities.

19. (New): The method of claim 18 wherein the step of collecting the information from the device includes manually downloading the information from the device.

20. (New): The method of claim 18 wherein the electronic data entry device is located at a location remote from a placement agency seeking the information.

21. (New): The method of claim 18 wherein the electronic data entry device is non-networked.
